Jeremías **Likerman**

Adjunct Researcher, CONICET · Associate Professor, University of Buenos Aires

Institute of Andean Studies "Don Pablo Groeber" (IDEAN), Argentina

jlikerman@uba.ar · Google Scholar · ORCID 0000-0003-3844-2085

EDUCATION

2015 — **PhD in Geological Sciences**
University of Buenos Aires, Argentina

2010 — **BSc in Geological Sciences**
University of Buenos Aires, Argentina

MAIN CAREER HISTORY

2026–present — **Associate Professor** — *Argentina*
Department of Geological Sciences, University of Buenos Aires

2018–present — **Adjunct Researcher (Investigador Adjunto)** — *Argentina*
CONICET–IDEAN

May–Sep 2025 — **Visiting Researcher** — *Spain*
GEO3BCN–CSIC

Aug–Sep 2024 — **Visiting Researcher** — *Spain*
GEO3BCN–CSIC

2015–2017 — **Postdoctoral Researcher** — *Argentina/Spain*
CONICET and Universitat Politècnica de Catalunya

2013–2014 — **Visiting Doctoral Researcher** — *USA*
Stanford University

MAJOR RESEARCH ACHIEVEMENTS

- More than 15 years of research in structural geology and multiscale numerical modelling, integrating field observations, analogue experiments, geomechanics, and 2D/3D simulations.
- Developed predictive approaches for natural-fracture distribution and connectivity in folded structures and energy reservoirs, including the Yacoraite carbonates and the Vaca Muerta Formation.
- Leads and co-leads national and international projects on subduction dynamics, lithospheric deformation, and geothermal systems; coordinator of CONICET–CSIC cooperation on geothermal modelling (2024–2026).
- Supervises early-career researchers and undergraduate, doctoral, and postdoctoral work in structural geology, geomechanics, and numerical modelling.

SELECTED RECENT MAJOR PUBLICATIONS

1. Villarroel, M.A. et al., including Likerman, J. (2026).
   The role of compressional structures in the development of collapse calderas.
   Journal of Volcanology and Geothermal Research 473, 108582.
2. Gianni, G.M., Gallo, L.C., Likerman, J., et al. (2025).
   Slab underthrusting is the primary control on flat-slab size.
   Science Advances 11(28).
3. Gianni, G.M., Likerman, J., Navarrete, C.R., Gianni, C.R., & Zlotnik, S. (2023).
   Ghost-arc geochemical anomaly at a spreading ridge caused by supersized flat subduction.
   Nature Communications 14, 2083.
4. Correa-Luna, C., Yagupsky, D.L., Likerman, J., & Barcelona, H. (2025).
   Impact of large-scale structures on fracture network connectivity in the Vaca Muerta play.
   Tectonophysics 230640.
5. Likerman, J., Zlotnik, S., & Li, C.-F. (2021).
   The effects of small-scale convection in the shallow lithosphere of the North Atlantic.
   Geophysical Journal International 227(3), 1512–1522.
